

How to find first and last digit of a number

```
#include <stdio.h>
```

```
int main() {
```

```
    int number, last digit;
```

```
    printf("Enter a number : ");
```

```
    scanf("%d", &number);
```

```
    last digit = num % 10
```

```
    printf("The last digit is : %d\n", last digit);
```

```
    return 0;
```

```
}
```

Output

1 2 3 4 5

last digit = 5
